Profile

Dedicated Front-End Web Developer passionate about contributing to innovation through impactful projects and scalable software architectures. Proficient in building responsive web applications and native Android apps, with a focus on delivering high-quality, user-centric solutions that drive technical excellence.

Education

Sarvajanik University | **June 2023 – expected July 2027**
B.Tech. Information Technology (Current CGPA: 8.47/10.0) | *Surat, Gujarat*
Higher Secondary Education | **2021 – 2023**
Metas Adventist School | *Surat, Gujarat*

Relevant Coursework

Design and Analysis of Algorithms, Advanced Web Technologies, Database Management, Object-Oriented Programming (Java/C++), Software Engineering, Computer Network Systems.

Projects

Real-Time Weather Forecasting Application | *HTML5, CSS3, JavaScript, OpenWeatherMap API* **September 2025**
- Engineered a dynamic weather dashboard using JavaScript (ES6+) and OpenWeatherMap API to fetch and display live atmospheric data based on user-defined parameters.
- Implemented asynchronous logic using the Fetch API and Async/Await to manage real-time data retrieval and update the DOM without page refreshes.

Personal Portfolio | *HTML5, CSS3, JavaScript, Bootstrap 5* **November 2025**
- Engineered a responsive portfolio using HTML5, CSS3, and Bootstrap 5, ensuring fluid layout transitions and 100% compatibility across mobile, tablet, and desktop viewports.
- Developed interactive UI components and scroll-animations by implementing the Intersection Observer API in Vanilla JavaScript to improve site performance and user engagement.

Android Task Management Application | *Java, XML, Android Studio, SQLite* **January 2024**
- Developed a native Android application during a technical program at **IIT Bhubaneswar (Technook)**, focusing on local data persistence and mobile UI/UX.
- Engineered a robust local database using **SQLite** to perform CRUD (Create, Read, Update, Delete) operations, ensuring persistent storage for user tasks and reminders.

Technical Skills

Languages: Python, C++, XML Layouts, HTML, CSS, ReactJs, JavaScript, MySQL, SQLite, MongoDB, NodeJS
Software and Tools: VS Code, GitHub, Figma, Android Studio.
Frameworks and Libraries: Bootstrap 5 (Web), Android SDK (Mobile), Django(basic), jQuery

Certifications

EasySkill Academy | **August 2025 – Present**
Professional Certification in Web Development | *Surat, Gujarat*
- Developed responsive, mobile-first web interfaces using **HTML5, CSS3, and Bootstrap 5**, ensuring 100% compatibility across various device viewports.
- Engineered interactive user features and dynamic content updates using **ES6+ JavaScript** and efficient DOM manipulation techniques.
- Streamlined development workflows by implementing **REST API** integrations and maintaining clean, modular code architecture.

Wissenaire (IIT Bhubaneswar) | Technook | **October 2023 – December 2023**
Certification in Android App Development | *Online*
- Built native mobile applications using **Java and Android SDK**, implementing core functionalities like Activity lifecycles and intent transitions.
- Implemented local data persistence using **SQLite**, enabling seamless offline storage and retrieval of user-specific information.
- Designed functional, high-fidelity user interfaces by applying **Material Design** principles and XML layout optimization.
